

THINGS TO CONSIDER

Bring an outfit you can wear for both maternity & newborn sessions for a "Before/After" look with baby

I highly recommend booking in a complimentary pre session styling consult. Get help and advice choosing the best clothing from your wardrobe, the Studio wardrobe or a combination of both.

I also highly recommend you consider having hair and/or makeup booked in. Professional portraits are an investment and professionals are available to make you look and feel your best! If you haven't selected this as an add-on to your appointment at the time of booking, feel free to contact Angela to arrange.

YOUR MATERNITY SESSION

- ♥ Think about the finer details - eg groomed eyebrows, roots recently touched up & tidy nails make all the difference!
- ♥ Flowing dresses look beautiful for Maternity portraits - they also help avoid clothing marks should you wish to do some partial or implied nudity portraits to show off that bump!
- ♥ Don't forget to bring suitable underwear for dark and light clothing! Bring nude coloured underwear if you wish to imply nudity without actually getting naked!
- ♥ Couples: Coordinate your outfits. Wear items that complement each other in style and tone... but remember similar styles are good. Matchy Matchy outfits are BAD!
- ♥ Don't wear stripes, lots of patterns or large logos - they are distracting. Also avoid wearing bright shades of yellow, orange or pink. They can alter skin tones in unattractive ways
- ♥ Don't get a new haircut any less than a week before the shoot, give your hair time to settle
